## Electrical Time Savers

There are many Electric Heating Devices made for attachment to electric light and power circuits. They enhance the utility of domestic and household appliances and may be attached to any ordinary lamp socket.

ELECTRIC IRONS are so far superior to the old style irons that arguments are unnecessary. It is sufficient to say that no one who has ever used an electric iron is willing to dispose with it.

ELECTRIC WATER HEATERS boil water in five minutes without dirt, odor, danger or waste heat. One of these heaters is an ideal thing when the baby cries at night. By its aid a bottle of milk can be warmed in a minute.

A simple trial will convince.
